

## LockNLoad™ Platform

### HEAVY DUTY ROOF RACK PLATFORM

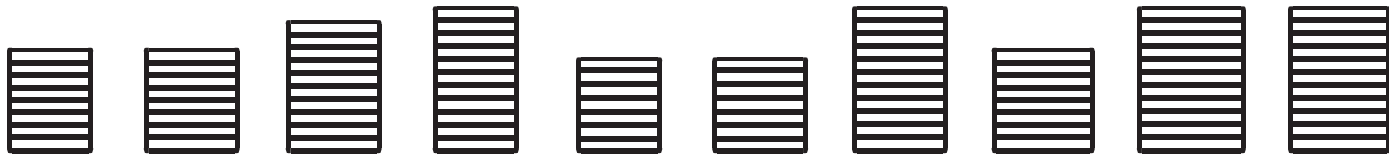

From rugged tracks to remote campsites or just the Saturday sports run, the NEW Yakima LockNLoad Platform is shaped to cut through it with its modern, aesthetically styled and is built to take it all on. Packing the same signature Yakima features you know and trust, we've thrown in some added features including underside accessory slots, integrated cable routing to keep your setup clean and dialled, full width lightbar compatibility and made it lighter so you can haul more gear up top. Tested on the roughest tracks the country can throw at it and built to cruise through whatever comes next, because smooth roads don't make for good stories.

#### COMPETITIVE EDGE

- ▶ Accessory slots on the underside of all perimeter sides allow for more of your favourite accessories and gear to be fitted.
- ▶ Integrated wind deflector assists with quieter rides when cruising at speed.
- ▶ Compatible with RuggedLine HD, RuggedLine and ute tub systems (OverHaul HD, OutPost HD, BedRock HD), plus Yakima legs and towers.

#### WEIGHT LIMIT

- ▶ Tested and certified up to a 150 kg dynamic offroad load rating. (Vehicle load ratings apply.)

### Cable Management Sorted

Easy to use cable management around the perimeter allows you to install your spotlights, radios/UHF and solar while keeping your cables neat and tidy.

### Lighter Platform, Heavier Haul

Reduced weight without compromising the loading efficiency.

### Shaped to Cut Through It

Refined, modern design with an integrated wind deflector for a quieter ride at speed.

### Signature East-to-West Slat Design

East-to-West slats with 21 mm accessory slots lets you carry your load like a pro. Easy side loading, seamless gear mounting, no adapters needed.
